

Charge/Product/Service	Standard charge, water			Standard charge, sewerage water	
	Unit	Tax free €	With tax €, VAT 24 %	Tax free €	With tax €, VAT 24 %
STANDARD CHARGE ACCORDING TO METER SIZE					
≤ 20 mm	€/year	41,94	52,00	41,94	52,00
25 – 32 mm	€/year	182,26	226,00	182,26	226,00
40 mm	€/year	237,10	294,00	237,10	294,00
50 - 65 mm	€/year	366,94	455,00	366,94	455,00
80 mm	€/year	503,23	624,00	503,23	624,00
≥ 100 mm	€/year	625,00	775,00	625,00	775,00

Charge/Product/Service	Unit	Tax free €	With tax €, VAT 24 %
WATER SUPPLY	€/m ³	1,23	1,52
SEWERAGE WATER	€/m ³	1,60	1,98
STANDARD CHARGE UNDER CONSTRUCTION			
A detached house project, water consumption in estimated bills	€	32,26	40,00
A semi-detached house project, water consumption in estimated bills	€	64,52	80,00
A terraced house project, water consumption in estimated bills if no meters	€	161,29	200,00
Large construction projects, water consumption from meter reading			
RECEPTION CHARGES FOR SEPTIC TANK SEWAGE			
Septic tank sewage	€/m ³	6,05	7,50
For closed septic tanks	€/m ³	1,68	2,08

SPRINKLER FEES

Sprinkler charges are collected for separate fire extinguishers built in properties and connected to the main water supply
Yearly charges for supplying extinguisher water for a chosen property are collected according to the table below

Sprinkler class	flow l/s	grounds for charges
Light K, LH	≤ 3,8	200m ³ water charge / connection
Normal NI, OH 1	3,9-9	300m ³ water charge / connection
Normal NII, OH 2	9,1-17	400m ³ water charge / connection
Normal NIII, OH 3	17,1-23	500m ³ water charge / connection
Normal NIII E, OH 4	23,1-35	600m ³ water charge / connection
Heavy R production sites, HHP	35,1-76	800m ³ water charge / connection
R, storage sites, HHS	35,1-160	800m ³ water charge / connection

The water utility charges the real expenses caused by the building of extinguisher water connection pipes, their renovation and possible changes in the main water pipes from the owner of the property.

WATER MANAGEMENT CONNECTION CHARGES (incl. water and sewerage), REGIONS UNDER TOWN-PLANNING SCHEME

New connection charges are transferable and refundable

Individual detached houses (building right 500 m² max.)

Connection charges for all detached houses (max 500 m²) are categorised into two flat rates according to the building right stated by the town-planning scheme.

Flat rate	Type of housing	Building right according to the town-planning scheme	Connection charges (Euro)
1	Detached and semi-detached	≤ 250 m ²	2 770 €
2	Detached, semi-detached and chained houses	> 250 m ² ... ≤ 500 m ²	4 410 €

Residential buildings (building right over 500 m²) and other buildings

For calculating the connection charge for residential and other buildings with over 500 m² we use, in addition to the building right stated in the town-planning scheme, for the ratio of the land a coefficient (coefficient 2-5) depending on the type of the building according to the following formula:

Type of building	Symbols in town-planning scheme most commonly used	Land coefficient K
Detached, semi-detached, terraced and chained (residential buildings with two floors max.)	AO, AP, AR, AKR II	5
Residential apartment buildings (residential buildings with three or more floors)	AK III	4
Joined residential, commercial and office buildings	AL	4
Public buildings, services	Y, P	3
Office, commercial and industrial buildings	K, KL, T	3
Storage facilities	T	2
Stables, cattle sheds and corresponding	RHU, M	2

$$L = K \times Y \times A$$

L= property connection charge

K= land coefficient according to property

Y= unit price (separate for water and sewerage 0,90 euro/m²)

A= building right according to town-planning scheme (k-m²)

Connection charge for secondary residences (R, RA-area) is the same as for residential buildings but raised by 50%.

REGIONS OUTSIDE TOWN-PLANNING SCHEME (connection charge for dispersed settlement)

For the regions outside the town-planning scheme (dispersed settlement) raised connection charges are collected irrespective of the type of building as follows:

Overall floor area	connection charge, water	connection charge, sewerage
≤ 250 k-m ²	2 770 €	2 770 €
> 250 m ² ... ≤ 400 m ²	3 900 €	3 900 €
> 400 m ² ... ≤ 500 m ²	4 410 €	4 410 €
> 500 k-m ²	according to the implementing guidelines for connection charge, however, minimum 4 410 € water and 4 410 € sewerage	

ADDITIONAL CONNECTION CHARGE OF THE WATER UTILITY

Additional connection charges are collected for building extensions and for sites built in separate stages either according to the intended floor area of the extension or according to the remaining building right.

For individual detached houses the additional connection charge is used outside the town-planning scheme (grounds for the additional connection charge is the floor area, not the building right).

Each extension will be verified separately and the charge will be decided according to separate implementing guidelines.

The grounds for additional connection charge (unit price and land coefficient) are the same as presented in the table above.
